

Cross-Connection (backflow assembly) Tester Criteria

Certified backflow testers must submit the following credentials to test backflows in the TriRiver Water area:

1. Copy of the “Calibration Certificate” for the backflow test kit.
 - a. Backflow test kits **must** be calibrated annually. A copy of the new “Calibration Certificate” **must** be submitted to our Utility Connection Coordinator (see below).
2. Copy of the “Certificate of Certification” for the individual tester.
 - a. Any individual tester that recertifies as a backflow tester, **must** submit a copy of the new “Certificate of Certification” to our Utility Connection (see below).
3. Submit the “Test and Maintenance Report” for the backflow device being tested.
