**TriRiver Water Launches July 1**

Sanford, NC - June 28, 2024 - On July 1, 2024, TriRiver Water will officially become the regional water and wastewater services provider for residential and business customers served by the City of Sanford and the Town of Pittsboro.

TriRiver Water was created following the merger of the City of Sanford and the Town of Pittsboro water and wastewater services. The new TriRiver Water name and logo represent the three rivers that meet in the Cape Fear River Basin, where they become the raw water source for the region.

With the combined water services resources from the merger, TriRiver Water is able to efficiently serve a growing customer base while also making necessary infrastructure improvements to meet regional water and wastewater needs for years to come.

Future plans as part of the Town of Pittsboro and City of Sanford water and wastewater services collaboration include expanding water capacity from 12 million to 30 million gallons per day to serve the growing region.

The TriRiver Water website, [tririverwater.com](http://tririverwater.com), launches on July 1, 2024. Customers can sign up for water services notifications on the new website. TriRiver Water will also share information via Facebook and Instagram.
